 - > Involved project
 - > [Notifications](#)
- User can change and modify
 - A user can create a project or be invited to collaborate on a project
 - Optional: A user can be notified when: it is invited to a new project, when a task is due or when the projects has ended.

- Project

- > Name
- > Users (with rights)
- > Columns with tasks (task-stage) —> 4 +?
- > Access through invite

- Task

- > Description
 - > Title
 - > Type of task (color coded)
 - > Date Created
 - > Due date
 - > Involved users (users that are responsible for the task at a specific stage)
 - > File, Link ?
 - > Prio#
- There would be a picture/image for each participant. When passing over the pictures will be displayed in full. When clicking on an image popup window with name, contacts, role in this project of the participant will be displayed.
 - “Stickers” are drag and drop, when dropping in a new “assigned” field the app will ask which of the participants (one or more) is responsible of a specific feature
 - When selecting a “Sticker” the image will zoom (popup window) and details of the task and schedule are displayed.
 - “Stickers” are coloured depending on the “type of task” is possible to create a legenda(?) when creating the project and adding new “type of tasks” when creating the new task etc.
